| Product name                                 | :    | WHITE ACETAL   |
| Product code                                 | :    | CC10142740   |
| Chemical Name                                | :    | Mixture  |
| CAS-No.                                      | :    | Mixture  |
| Product Use                                  | •    | Industrial Applications  |

### 2. COMPOSITION/INFORMATION ON INGREDIENTS

| Components        | CAS-No.    | Weight percent |
|-------------------|------------|----------------|
| Silica, amorphous | 7631-86-9  | 1 - 5          |
| Titanium dioxide  | 13463-67-7 | 10 - 30        |

### **3. HAZARDS IDENTIFICATION**

#### **EMERGENCY OVERVIEW**

This mixture has not been evaluated as a whole. Information provided on the health effects of this product is based on individual components. All ingredients are bound and potential for hazardous exposure as shipped is minimal. However, some vapors may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure.

#### POTENTIAL HEALTH EFFECTS

| <b>Routes of Exposure:</b> | : Inhalation, Ingestion, Skin contact   |
|----------------------------|---|
| Acute exposure             |   |
| Inhalation                 | : Particulates, like other inert materials can be mechanically irritating. If overheated or burnt, the polymer releases formaldehyde. |
| Ingestion                  | : May be harmful if swallowed.  |
| Eyes                       | : Particulates, like other inert materials can be mechanically irritating.  |
| Skin                       | : Experience shows no unusual dermatitis hazard from routine handling.  |
| Chronic exposure           | : Refer to Section 11 for Toxicological Information.  |

PolyOne.

## MATERIAL SAFETY DATA SHEET WHITE ACETAL

Version Number 1.1 Revision Date 03/23/2014 Page 2 of 7 Print Date 3/31/2014

| Medical Conditions<br>Aggravated by Exposure:   | : None known.  |
|---|--|
|   | 4. FIRST AID MEASURES  |
| Inhalation  | : Move to fresh air in case of accidental inhalation of fumes from overheating or combustion. When symptoms persist or in all cases o doubt seek medical advice.   |
| Ingestion   | : Do not induce vomiting without medical advice. When symptoms persist or in all cases of doubt seek medical advice.   |
| Eyes  | : Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If eye irritation persists, seek medical attention.   |
| Skin  | : Wash off with soap and plenty of water. If skin irritation persists seek medical attention.  |
|   | 5. FIREFIGHTING MEASURES   |
| Flash point   | : not applicable   |
| Flammable Limits<br>Upper explosion limit<br>Lower explosion limit<br>Auto-ignition temperature<br>Suitable extinguishing media<br>Special Fire Fighting<br>Procedures<br>Unusual Fire/Explosion<br>Hazards | <ul> <li>not applicable</li> <li>not applicable</li> <li>not applicable</li> <li>Carbon dioxide blanket, Water spray, Dry powder, Foam.</li> <li>Fullface self-contained breathing apparatus (SCBA) used in positive pressure mode should be worn to prevent inhalation of airborne contaminants.</li> <li>Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), other hazardous materials, and smoke are all possible. If overheated or burnt, the polymer releases formaldehyde. May burn with invisible flame.</li> </ul> |
|   | 6. ACCIDENTAL RELEASE MEASURES   |
| Personal precautions  | : Wear appropriate personal protection during cleanup, such as impervious gloves, boots and coveralls.   |
| Environmental precautions   | : Should not be released into the environment. The product should not be allowed to enter drains, water courses or the soil.   |
| Methods for cleaning up   | : Clean up promptly by sweeping or vacuum. Package all material in plastic, cardboard or metal containers for disposal.  |
|   | 7. HANDLING AND STORAGE  |
| Handling  | : Take measures to prevent the build up of electrostatic charge. Open  |

# MATERIAL SAFETY DATA SHEET WHITE ACETAL

|--|-------|---|
|  |       | container only in a well-ventilated area. Heat only in areas with appropriate exhaust ventilation.  |
| Storage                                    | :     | Keep containers dry and tightly closed to avoid moisture absorption<br>and contamination. Keep in a dry, cool place.  |
| 8. EX                                      | POSUI | RE CONTROLS/PERSONAL PROTECTION   |
| Respiratory protection                     | :     | No personal respiratory protective equipment normally required.<br>When temperatures exceed 230°C (446°F) and ventilation is<br>inadequate to maintain concentrations below exposure limits, use a<br>positive air supplied respirator. Air purifying respirators may not<br>provide adequate protection. |
| Eye/Face Protection                        | :     | Safety glasses with side-shields Wear face-shield and protective suit for abnormal processing problems.   |
| Hand protection                            | :     | Protective gloves   |
| Skin and body protection                   | :     | Long sleeved clothing   |
| Additional Protective<br>Measures          | :     | Safety shoes  |
| General Hygiene<br>Considerations          | :     | Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.  |
| Engineering measures                       | :     | Heat only in areas with appropriate exhaust ventilation. Provide appropriate exhaust ventilation at machinery.  |
| Exposure limit(s)                          |       |   |
|  |       |   |

### **10. STABILITY AND REACTIVITY**

| Stability                | : | The product is stable if stored and handled as prescribed.  |
|--------------------------|---|---|
| Hazardous Polymerization | : | Will not occur.   |
| Conditions to avoid      | : | Maintain polymer temperature below 230°C (446°F). Avoid prolonged exposure at or above recommended processing temperature.  |
| Incompatible Materials   | : | Incompatible with strong oxidizers and with strong acids and bases<br>(decomposes to form formaldehyde). At melt temperatures, acetal<br>resins are incompatible with halogenated polymers such as vinyl<br>(PVC) and any elastomers containing any halogenated polymers. At<br>processing conditions, these materials are mutually destructive and<br>involve rapid degradation. Even small amounts of such contaminants<br>can cause sudden and spontaneous formaldehyde gas formation.<br>Workplace fume well above threshold levels are a likely result.<br>Unsafe pressurization of equipment such as extruder or mold can also<br>result. Thoroughly purge and mechanically clean processing<br>equipment to avoid even trace quantities of halogenated materials |

### MATERIAL SAFETY DATA SHEET WHITE ACETAL

| ersion Number 1.1<br>evision Date 03/23/2014 | Page 5 of<br>Print Date 3/31/201  |
|--|---|
|  | from coming in contact with the acetal. Prevent contamination of virgin or rework resin.  |
| Hazardous decomposition products             | : Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), other hazardous materials, and smoke are all possible. If overheated or burnt, the polymer releases formaldehyde. Decomposition of this material depends on the lenght of time it is exposed to elevated temperatures. At the recommended processing temperature of 210°C-220°C (410°F-428°F), decomposition should not be significant until after 30 minutes. Decomposition may be accelerated by contaminants, pigments and/or other additives. |
|  | 11. TOXICOLOGICAL INFORMATION   |

This mixture has not been evaluated as a whole for health effects. Exposure effects listed are based on existing health data for the individual components which comprise the mixture.

**Toxicity Overview** 

This product contains the following components which in their pure form have the following characteristics:

| CAS-No.    | Chemical Name     | Effect           | Target Organ              |
|------------|-------------------|------------------|---------------------------|
| 7631-86-9  | Silica, amorphous | Irritant         | Eyes, Respiratory system. |
| 13463-67-7 | Titanium dioxide  | Systemic effects | Respiratory system.       |

Carcinogenicity

This product contains the following components which, in their pure form, have the following carcinogenicity data:

| CAS-No.    | Chemical Name    | OSHA | IARC | NTP |
|------------|------------------|------|------|-----|
| 13463-67-7 | Titanium dioxide | no   | 2B   | no  |

IARC Carcinogen Classifications:

1 - The component is carcinogenic to humans.

2A - The component is probably carcinogenic to humans.

2B - The component is possibly carcinogenic to humans.

NTP Carcinogen Classifications:

1 - The component is known to be a human carcinogen.

2 - The component is reasonably anticipated to be a human carcinogen.

### **12. ECOLOGICAL INFORMATION**

| Persistence and degradability | : | Not readily biodegradable.   |
|-------------------------------|---|--|
| Environmental Toxicity        | : | Chemicals are not readily available as they are bound within the polymer matrix. |
| Bioaccumulation Potential     | : | Chemicals are not readily available as they are bound within the polymer matrix. |

PolyOne.
