## SAFETY DATA SHEET

## PG 378482.00 BU PP

## Section 1. Identification

GHS product identifier
Chemical name
CAS number
Other means of identification
Product type
: PG 378482.00 BU PP
Chemical name : Mixture
CAS number : Mixture
Other means of identification : CC10378482
Product type : solid
Relevant identified uses of the substance or mixture and uses advised against Product use
: Industrial applications.
Supplier's details
: AVIENT CORPORATION
33587 Walker Road, Avon Lake, OH 44012
1 (440) 930-1000 or 1 (844) 4AVIENT
Emergency telephone number
: CHEMTREC 1-800-424-9300 (24hrs for spill, leak, fire, exposure or (with hours of operation) accident).

## Section 2. Hazards identification

This mixture has not been evaluated as a whole. Information provided on the health effects of this product is based on individual components. All ingredients are bound and potential for hazardous exposure as shipped is minimal. However, some vapors may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure.After handling, always wash hands thoroughly with soap and water.

| OSHA/HCS status | $: \quad$While this material is not considered hazardous by the OSHA Hazard <br> Communication Standard (29 CFR 1910.1200), this SDS contains <br> valuable information critical to the safe handling and proper use of the <br> product. This SDS should be retained and available for employees and <br> other users of this product. |
| :--- | :--- | :--- |
| Classification of the substance or <br> mixture | $: \quad$ Not classified. |

## GHS label elements

## Signal word

Hazard statements
: No signal word.
: No known significant effects or critical hazards.

PG 378482.00 BU PP
Version Number 1.0

Revision Date 06/01/2023

## Precautionary statements

## Section 3. Composition/information on ingredients

| Substance/mixture | $:$ | Mixture |
| :--- | :--- | :--- |
| Chemical name | $:$ | Mixture |
| Other means of identification | $:$ | CC10378482 |

## CAS number/other identifiers

Any concentration shown as a range is to protect confidentiality or is due to batch variation.
There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

## Description of necessary first aid measures

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation

Skin contact
: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
Ingestion
: Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

| suitable training. |  |

## See toxicological information (Section 11)

## Section 5. Fire-fighting measures

## Extinguishing media

Suitable extinguishing media
Unsuitable extinguishing media
Specific hazards arising from the chemical

Hazardous thermal decomposition products
: In case of fire, use water spray (fog), foam, dry chemical or $\mathrm{CO}_{2}$.
: None known.
: No specific fire or explosion hazard.
: Decomposition products may include the following materials: carbon dioxide carbon monoxide
: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
: Fire-fighters should wear appropriate protective equipment and selfcontained breathing apparatus (SCBA) with a full face-piece operated

PG 378482.00 BU PP

in positive pressure mode.

## Section 6. Accidental release measures

## Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.
For emergency responders
: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

## Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

## Methods and materials for containment and cleaning up

Small spill : Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.
Large spill
: Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

## Precautions for safe handling

## Protective measures

 Advice on general occupational hygieneConditions for safe storage, including any incompatibilities
: Put on appropriate personal protective equipment (see Section 8 ).
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use.

Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

## Section 8. Exposure controls/personal protection

## Control parameters

Occupational exposure limits
None.

## Appropriate engineering controls

Environmental exposure controls
: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## Individual protection measures

Hygiene measures

## Eye/face protection

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

## Skin protection

## Hand protection

## Body protection

## Other skin protection

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this

## PG 378482.00 BU PP

## Respiratory protection

product.
: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## Section 10. Stability and reactivity

| Reactivity | $:$ | No specific test data related to reactivity available for this product or <br> its ingredients. |
| :--- | :--- | :--- |
| Chemical stability | $:$ | Stable under recommended storage and handling conditions (see <br> Section 7). |
| Possibility of hazardous reactions | $:$ | Under normal conditions of storage and use, hazardous reactions will <br> not occur. |
| Conditions to avoid | $:$ | Keep away from extreme heat and oxidizing agents. |
| Incompatible materials | $:$ | Keep away from strong acids. |
| Hazardous decomposition | $:$ | Oxidizer. |
| Under normal conditions of storage and use, hazardous decomposition <br> products |  | products should not be produced. |

## Section 11. Toxicological information

## Information on toxicological effects

## Acute toxicity

Conclusion/Summary : Mixture.Not fully tested.

## Irritation/Corrosion

| Other adverse effects | $: \quad$ No known significant effects or critical hazards. |

## Section 13. Disposal considerations

| Disposal methods | : | The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
