| Components        | CAS-No.    | Weight percent |
|-------------------|------------|----------------|
| Titanium dioxide  | 13463-67-7 | 0.1 - 1        |
| Calcium carbonate | 1317-65-3  | 10 - 30        |
| Calcium carbonate | 471-34-1   | 10 - 30        |

#### **3. HAZARDS IDENTIFICATION**

#### **EMERGENCY OVERVIEW**

This mixture has not been evaluated as a whole for health effects. Information provided on health effects of this product is based on the individual components. However, some vapors or contaminants may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure. See sections 8 and 11 for special precautions. Do not use this pigment in polymers at temperatures over 200°C (392°F). Decomposition of diarylide pigments in polymers at temperatures over 200°C (392°F) may produce trace amounts of monoazo dyes, which in turn can decompose to produce aromatic amines. The amount and type of degradation products formed depend on the dwell time, formulation and processing conditions as well as temperature. As conditions become more severe, as when temperatures move into the 240-300°C (464-572°F) range, trace quantities of 3,3'-dichlorobenzidine can be generated. 3.3'-dichlorobenzidine is classified as a suspect carcinogen by NTP and IARC, is classified as Acute Toxicity category 4 and Carcinogen Category 1B according to 1272/2008EC (CLP), and is regulated by OSHA as a suspect carcinogen. In order to avoid the generation of and exposure to 3,3'-dichlorobenzidine, do not use diarylide pigments in polymers when temperatures exceed 200°C (392°F). Handle with care. Organic dusts have the potential to be explosive with static spark or flame initiation.

#### POTENTIAL HEALTH EFFECTS

| Routes of Exposure:                           | : Inhalation, Skin contact, Ingestion   |  |
|---|---|--|
| Acute exposure                                |   |  |
| Inhalation                                    | : Inhalation of airborne droplets may cause irritation of the respiratory tract.  |  |
| Ingestion                                     | : May be harmful if swallowed.  |  |
| Eyes  | : May cause eye and skin irritation.  |  |
| Skin  | : Experience shows no unusual dermatitis hazard from routine handling.  |  |
| Chronic exposure                              | : Refer to Section 11 for Toxicological Information.  |  |
| Medical Conditions<br>Aggravated by Exposure: | : None known.   |  |
|   | 4. FIRST AID MEASURES   |  |
| Inhalation                                    | : Move to fresh air in case of accidental inhalation of fumes from overheating or combustion. When symptoms persist or in all cases of doubt seek medical advice. |  |
| Ingestion                                     | : Do not induce vomiting without medical advice. When symptoms persist or in all cases of doubt seek medical advice.  |  |
| Eyes  | Rinse immediately with plenty of water for at least 15 minutes. If eye irritation persists, seek medical attention.   |  |
| Skin  | : Wash off with soap and plenty of water. If skin irritation persists seek medical attention.   |  |
|   | 5. FIREFIGHTING MEASURES  |  |
| Flash point                                   | : no data available   |  |
| Flammable Limits                              |   |  |
| Upper explosion limit                         | : no data available   |  |
| Lower explosion limit                         | : no data available   |  |
| Auto-ignition temperature                     | : Not applicable  |  |
| Suitable extinguishing media                  | : Carbon dioxide blanket, Water spray, Dry powder, Foam.  |  |
| Special Fire Fighting                         | : Fullface self-contained breathing apparatus (SCBA) used in positive   |  |
| Procedures                                    | pressure mode should be worn to prevent inhalation of airborne  |  |
|   | contaminants.   |  |
| Unusual Fire/Explosion                        | : May emit Hydrogen Chloride (HCl) or Carbon Monoxide (CO) under  |  |
| Hazards                                       | fire conditions. Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), other hazardous materials, and smoke are all possible.                     |  |

### **MATERIAL SAFETY DATA SHEET** 40000SSV SCARLET

| Version Number 1.5<br>Revision Date 12/27/2012                | Page 5<br>Print Date 12/27/2   |   |
|---|--|---|
| Incompatible Materials<br>Hazardous decomposition<br>products | <ul> <li>Incompatible with strong acids and oxidizing agents., Avoid contact with acetal homopolymers and acetal copolymers during processing.</li> <li>Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), hydrogen chloride (HCl), other hazardous materials, and smoke are all possible. Prolonged heating may result in product degradation. As a general rule of thumb, degradation begins to occur after one hour at 177 °C (350 °F), after 10 minutes at 204 °C (400 °F), and within 5 minutes at 232 °C (450 °F). Do not use this pigment in polymers at temperatures over 200°C (392°F). Decomposition of diarylide pigments in polymers at temperatures over 200°C (392°F) may produce trace amounts of monoazo dyes, which in turn can decompose to produce aromatic amines. The amount and type of degradation products formed depend on the dwell time, formulation and processing conditions as well as temperature. As conditions become more severe, as when temperatures move into the 240-300°C (464-572°F) range, trace quantities of 3,3'-dichlorobenzidine can be generated. 3,3'-dichlorobenzidine is classified as a suspect carcinogen by NTP and IARC, is classified as Acute Toxicity category 4 and Carcinogen Category 1B according to 1272/2008EC (CLP), and is regulated by OSHA as a suspect carcinogen. In order to avoid the generation of and exposure to 3,3'-dichlorobenzidine, do not use diarylide pigments in polymers when temperatures exceed 200°C (392°F). Handle with care. Organic dusts have the potential to be explosive with static spark or flame initiation.</li> </ul> | 1 |

#### **11. TOXICOLOGICAL INFORMATION**

This mixture has not been evaluated as a whole for health effects. Exposure effects listed are based on existing health data for the individual components which comprise the mixture.

<u>Toxicity Overview</u> This product contains the following components which in their pure form have the following characteristics:

| CAS-No.    | Chemical Name     | Effect           | Target Organ            |
|------------|-------------------|------------------|-------------------------|
| 13463-67-7 | Titanium dioxide  | Systemic effects | Respiratory system.     |
| 1317-65-3  | Calcium carbonate | Irritant         | Eyes, Skin.             |
|            |                   | Systemic effects | Eyes, Skin, Respiratory |
|            |                   |                  | system.                 |
| 471-34-1   |                   | Irritant         | Eyes, Skin.             |

#### LC50 / LD50

This product contains the following components which, in their pure form, have the following toxicity data:

#### Carcinogenicity

This product contains the following components which, in their pure form, have the following carcinogenicity data:

| CAS-No.    | Chemical Name    | OSHA | IARC | NTP |
|------------|------------------|------|------|-----|
| 13463-67-7 | Titanium dioxide | no   | 2B   | no  |

IARC Carcinogen Classifications:

1 - The component is carcinogenic to humans.

2A - The component is probably carcinogenic to humans.

2B - The component is possibly carcinogenic to humans.

NTP Carcinogen Classifications:

1 - The component is known to be a human carcinogen.

2 - The component is reasonably anticipated to be a human carcinogen.

|                               | 12. ECOLOGICAL INFORMATION   |
|-------------------------------|--|
| Persistence and degradability | : Not readily biodegradable.   |
| Environmental Toxicity        | : Environmental toxicity has not been established for this mixture as a whole.   |
| Bioaccumulation Potential     | : no data available  |
| Additional advice             | : no data available  |
|                               | 13. DISPOSAL CONSIDERATIONS  |
| Product                       | : Where possible recycling is preferred to disposal or incineration. Th generator of waste material has the responsibility for proper waste classification, transportation and disposal in accordance with applicable federal, state/provincial and local regulations. |
| Contaminated packaging        | : Recycling is preferred when possible. The generator of waste material has the responsibility for proper waste classification, transportation and disposal in accordance with applicable federal, state/provincial and local regulations.                             |
|                               | 14. TRANSPORT INFORMATION  |
| U.S. DOT Classification       | : Refer to specific regulation.  |
| ICAO/IATA                     | : Refer to specific regulation.  |
|                               |  |
