### 2. COMPOSITION/INFORMATION ON INGREDIENTS

| Components          | CAS-No.   | Weight percent |
|---------------------|-----------|----------------|
| Magnesium carbonate | 546-93-0  | 1 - 5          |
| Calcium carbonate   | 1317-65-3 | 5 - 10         |

#### **3. HAZARDS IDENTIFICATION**

#### **EMERGENCY OVERVIEW**

This mixture has not been evaluated as a whole for health effects. Information provided on health effects of this product is based on the individual components. However, some vapors or contaminants may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure. See sections 8 and 11 for special precautions.

#### POTENTIAL HEALTH EFFECTS

| <b>Routes of Exposure:</b> | : Inhalation, Skin contact, Ingestion                                            |  |
|----------------------------|----------------------------------------------------------------------------------|--|
| Acute exposure             |                                                                                  |  |
| Inhalation                 | : Inhalation of airborne droplets may cause irritation of the respiratory tract. |  |
| Ingestion                  | : May be harmful if swallowed.                                                   |  |
| Eyes                       | : May cause eye and skin irritation.                                             |  |
| Skin                       | : Experience shows no unusual dermatitis hazard from routine handling.           |  |
| Chronic exposure           | : Refer to Section 11 for Toxicological Information.                             |  |

### **10. STABILITY AND REACTIVITY**

| Stability                        | : | The product is stable if stored and handled as prescribed.                                                                                                                                                                                                                                                                            |
|----------------------------------|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hazardous Polymerization         | : | Will not occur.                                                                                                                                                                                                                                                                                                                       |
| Conditions to avoid              | : | Keep away from oxidizing agents and open flame. To avoid thermal decomposition, do not overheat.                                                                                                                                                                                                                                      |
| Incompatible Materials           | : | Incompatible with strong acids and oxidizing agents., Avoid contact with acetal homopolymers and acetal copolymers during processing.                                                                                                                                                                                                 |
| Hazardous decomposition products | : | Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), hydrogen chloride (HCl), other hazardous materials, and smoke are all possible. Prolonged heating may result in product degradation. As a general rule of thumb, degradation begins to occur after one hour at 177 °C (350 °F), after 10 minutes at 204 °C (400 |

#### **11. TOXICOLOGICAL INFORMATION**

This mixture has not been evaluated as a whole for health effects. Exposure effects listed are based on existing health data for the individual components which comprise the mixture.

Toxicity Overview

This product contains the following components which in their pure form have the following characteristics:

| CAS-No.   | Chemical Name       | Effect           | Target Organ            |
|-----------|---------------------|------------------|-------------------------|
| 546-93-0  | Magnesium carbonate | Irritant         | Skin.                   |
|           |                     | Systemic effects | Eyes, Skin, Respiratory |
|           |                     |                  | system.                 |
| 1317-65-3 | Calcium carbonate   | Irritant         | Eyes, Skin.             |
|           |                     | Systemic effects | Eyes, Skin, Respiratory |
|           |                     |                  | system.                 |

|                                      | 12. ECOLOGICAL INFORMATION                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
