# Section 2. Hazards identification

This mixture has not been evaluated as a whole for health effects. Information provided on health effects of this product is based on the individual components. However, some vapors or contaminants may be released upon heating and the end-user (fabricator) must take the necessary precautions (mechanical ventilation, respiratory protection, etc.) to protect employees from exposure. See sections 8 and 11 for special precautions. Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

| OSHA/HCS status                            | : | This material is considered hazardous by the OSHA Hazard<br>Communication Standard (29 CFR 1910.1200).   |
|--|---|--|
| Classification of the substance or mixture | : | SKIN IRRITATION - Category 2<br>EYE IRRITATION - Category 2A<br>SKIN SENSITIZATION - Category 1<br>TOXIC TO REPRODUCTION (Fertility) - Category 2<br>TOXIC TO REPRODUCTION (Unborn child) - Category 2 |

Version Number 1.5 Revision Date 01/09/2020 Page 3 of 20 Print Date 01/23/2020

| 1,2-Benzenedicarboxylic acid, di-C8-10-branched alkyl esters, C9-rich | 25 - 50 | 68515-48-0     |
|---|---------|----------------|
| Proprietary Hazardous Compounds                                       | 1 - 3   | Not available. |
| 2,4,4-Trimethyl-1,3-penytanediol diisobutyrate                        | 1 - 3   | 6846-50-0      |
| Titanium dioxide  | 0.3 - 1 | 13463-67-7     |
| Bisphenol A - Epichlorohydrin polymer                                 | 0.3 - 1 | 25068-38-6     |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

# Section 4. First aid measures

**Description of necessary first aid measures** 

| Eye contact  | : | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.   |
|--------------|---|---|
| Inhalation   | : | Remove victim to fresh air and keep at rest in a position comfortable<br>for breathing. If not breathing, if breathing is irregular or if respiratory<br>arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give<br>mouth-to-mouth resuscitation. Get medical attention. If unconscious,<br>place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie,<br>belt or waistband. In case of inhalation of decomposition products in a<br>fire, symptoms may be delayed. The exposed person may need to be<br>kept under medical surveillance for 48 hours. |
| Skin contact | : | Wash with plenty of soap and water. Remove contaminated clothing<br>and shoes. Wash contaminated clothing thoroughly with water before<br>removing it, or wear gloves. Continue to rinse for at least 10 minutes.<br>Get medical attention. In the event of any complaints or symptoms,<br>avoid further exposure. Wash clothing before reuse. Clean shoes  |

|           | thoroughly before reuse.  |
|-----------|---|
| Ingestion | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

| Eye contact<br>Inhalation<br>Skin contact<br>Ingestion | ::    | Causes serious eye irritation.<br>No known significant effects or critical hazards.<br>Causes skin irritation. May cause an allergic skin reaction.<br>No known significant effects or critical hazards. |

| Revision Date 01/09/2020   |   | Print Date 01/23/2020   |
|                            |   |   |
|                            |   |   |
|                            |   |   |
|                            |   | may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Specific treatments        | : | No specific treatment.  |
| Protection of first-aiders | : | No action shall be taken involving any personal risk or without                                 |

**ers** : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

# Section 5. Firefighting measures

#### Extinguishing media

| Suitable extinguishing media<br>Unsuitable extinguishing media                               | : | In case of fire, use water spray (fog), foam, dry chemical or $CO_2$ .<br>None known.   |
|--|---|---|
| Specific hazards arising from the<br>chemical<br>Hazardous thermal<br>decomposition products | : | In a fire or if heated, a pressure increase will occur and the container<br>may burst.<br>May emit Hydrogen Chloride (HCl).<br>Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>halogenated compounds |
| Special protective actions for fire-<br>fighters<br>Special protective equipment for         | : | Promptly isolate the scene by removing all persons from the vicinity<br>of the incident if there is a fire. No action shall be taken involving any<br>personal risk or without suitable training.<br>Fire-fighters should wear appropriate protective equipment and self-   |
| fire-fighters  |   | contained breathing apparatus (SCBA) with a full face-piece operated<br>in positive pressure mode.  |

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| : | No action shall be taken involving any personal risk or without<br>suitable training. Evacuate surrounding areas. Keep unnecessary and<br>unprotected personnel from entering. Do not touch or walk through<br>spilled material. Avoid breathing vapor or mist. Provide adequate<br>ventilation. Wear appropriate respirator when ventilation is |
|---|--|
|   | inadequate. Put on appropriate personal protective equipment.  |
|   | :  |

# Geon™ DB4979 Green 352 UV

| Version Number 1.5<br>Revision Date 01/09/2020 | Page 6 of 20<br>Print Date 01/23/2020   |
|--|---|
|  |   |
| For emergency responders                       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions                      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for containment          | nt and cleaning up  |
| Small spill                                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                                    | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

### Precautions for safe handling

| Protective measures                    | : | Put on appropriate personal protective equipment (see Section 8).<br>Persons with a history of skin sensitization problems should not be<br>employed in any process in which this product is used. Avoid<br>exposure - obtain special instructions before use. Avoid exposure<br>during pregnancy. Do not handle until all safety precautions have been<br>read and understood. Do not get in eyes or on skin or clothing. Do not<br>ingest. Avoid breathing vapor or mist. If during normal use the<br>material presents a respiratory hazard, use only with adequate<br>ventilation or wear appropriate respirator. Keep in the original<br>container or an approved alternative made from a compatible material,<br>kept tightly closed when not in use. Empty containers retain product<br>residue and can be hazardous. Do not reuse container. |
|--|---|--|
| Advice on general occupational hygiene | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands   |

and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities
 Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store in a well-ventilated place. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

# Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name   | Exposure limits   |
|---|---|
| 1,2-Benzenedicarboxylic acid, di-C8-10-<br>branched alkyl esters, C9-rich | None.   |
| 2,4,4-Trimethyl-1,3-penytanediol diisobutyrate                            | None.   |
| Proprietary Hazardous Compounds   | None.   |
| Bisphenol A - Epichlorohydrin polymer                                     | None.   |
| Titanium dioxide  | OSHA PEL 1989 (1989-03-01)<br>TWA 10 mg/m3 Form: Total dust<br>OSHA PEL (1993-06-30)<br>TWA 15 mg/m3 Form: Total dust<br>ACGIH TLV (1996-05-18)<br>TWA 10 mg/m3 |

| Appropriate engineering controls | : | If user operations generate dust, fumes, gas, vapor or mist, use process<br>enclosures, local exhaust ventilation or other engineering controls to<br>keep worker exposure to airborne contaminants below any<br>recommended or statutory limits. |
|----------------------------------|---|---|
| Environmental exposure controls  | : | Emissions from ventilation or work process equipment should be<br>checked to ensure they comply with the requirements of  |

| Version Number 1.5       | Page 8 of 20          |
|--------------------------|-----------------------|
| Revision Date 01/09/2020 | Print Date 01/23/2020 |
|                          |                       |

environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### **Individual protection measures**

| Hygiene measures<br>Eye/face protection | : | Wash hands, forearms and face thoroughly after handling chemical<br>products, before eating, smoking and using the lavatory and at the end<br>of the working period. Appropriate techniques should be used to<br>remove potentially contaminated clothing. Contaminated work<br>clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations<br>and safety showers are close to the workstation location.<br>Safety eyewear complying with an approved standard should be used<br>when a risk assessment indicates this is necessary to avoid exposure to<br>liquid splashes, mists, gases or dusts. If contact is possible, the<br>following protection should be worn, unless the assessment indicates a<br>higher degree of protection: chemical splash goggles. |
|---|---|--|
| Skin protection                         |   |  |
| Hand protection                         | : | Chemical-resistant, impervious gloves complying with an approved<br>standard should be worn at all times when handling chemical products<br>if a risk assessment indicates this is necessary. Considering the<br>parameters specified by the glove manufacturer, check during use that<br>the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures,<br>consisting of several substances, the protection time of the gloves<br>cannot be accurately estimated.   |
| Body protection                         | : | Personal protective equipment for the body should be selected based<br>on the task being performed and the risks involved and should be<br>approved by a specialist before handling this product.  |
| Other skin protection                   | : | Appropriate footwear and any additional skin protection measures<br>should be selected based on the task being performed and the risks<br>involved and should be approved by a specialist before handling this<br>product.   |
| Respiratory protection                  | : | Based on the hazard and potential for exposure, select a respirator that<br>meets the appropriate standard or certification. Respirators must be<br>used according to a respiratory protection program to ensure proper<br>fitting, training, and other important aspects of use.  |

# Section 13. Disposal considerations

:

Disposal methods

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
