

MATERIAL SAFETY DATA SHEET

GEON 3400

Version Number 1.1 Revision Date 07/03/2003

Page 1 of 6 Print Date 11/11/2011

1. PRODUCT AND COMPANY IDENTIFICATION

POLYONE CORPORATION 33587 Walker Road, Avon Lake, OH 44012

NON-EMERGENCY TELEPHONE	:	Product Stewardship (440)-930-1395	
Emergency telephone number	:	CHEMTREC 1-800-424-9300 (24hrs for spill, leak, fire, exposure or accident).	
Product name	:	GEON 3400	
Product code	:	S34000000H	
Chemical Name	:	Ethene, chloro-, homopolymer	
CAS-No.	:	9002-86-2	
Product Use	:	Industrial Applications	

2. COMPOSITION/INFORMATION ON HAZARDOUS INGREDIENTS

There are no known hazardous components above regulatory thresholds in this product.

3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

This product may contain residual vinyl chloride monomer (VCM) (CAS number 75-01-4) below 8.5 ppm (0.00085%). OSHA considers VCM a suspect carcinogen and regulates it under 29 CFR 1910.1017. It is unlikely, under normal working conditions with adequate ventilation, that the OSHA action level and exposure limits will be exceeded for residual VCM. However, the user should take the necessary precautions (e.g. mechanical ventilation, local exhaust ventilation, air-monitoring, respiratory protection, etc.) to ensure airborne levels of any vapors including VCM or dusts that may be released during heating or processing are below regulated levels.

POTENTIAL HEALTH EFFECTS

: Inhalation, Ingestion	
: Resin particles, like other inert materials, can be mechanically irritating. At process temperatures, product emissions may cause irritation.	
: No adverse health effects are anticipated.	
: Particulates, like other inert materials can be mechanically irritating. At process temperatures, product emissions may cause irritation.	
: Experience shows no unusual dermatitis hazard from routine handling.	
: Refer to Section 11 for Toxicological Information.	

MATERIAL SAFETY DATA SHEET

GEON 3400

Version Number 1.1 Revision Date 07/03/2003 Page 2 of 6 Print Date 11/11/2011

Aggravated by Exposure:		
	4. FIRST AID MEASURES	
Inhalation	: Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. When symptoms persist or in all cases of doubt seek medical advice.	
Ingestion	: Not an anticipated hazard.	
Eyes	: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If eye irritation persists, seek medical attention.	
Skin	: Wash off with soap and plenty of water. If skin irritation persists seel medical attention.	
	5. FIRE-FIGHTING MEASURES	
Flash point	: 736 °F ASTM D1929	
Flammable Limits Upper explosion limit Lower explosion limit Autoignition temperature Suitable extinguishing media Special Fire Fighting Procedures Unusual Fire/Explosion Hazards	 Not applicable Not relevant water spray, dry powder, foam, carbon dioxide (CO2). Fullface self-contained breathing apparatus (SCBA) used in positive pressure mode should be worn to prevent inhalation of airborne contaminants. The solid polymer can only be burned with difficulty. Fires will tend to self-extinguish in the absence of a substantial external source of hea or flame. Hydrogen Chloride (HCl) is generated upon product combustion. Prompt cleaning of surfaces with water based detergents is indicated after a fire to minimize corrosive attack. Vinyl resin dust has a very low tendency to explode. The minimum ignition energy fo vinyl resin dust clouds is much higher than that of natural materials such as starch and flour or of other plastic materials. However, as with any powder material, care should be taken to avoid creation of dust clouds and to minimize ignition sources. 	
	6. ACCIDENTAL RELEASE MEASURES	
Personal precautions	: Wear appropriate personal protection during cleanup, such as impervious gloves, boots and coveralls. Material can create slippery conditions.	
Environmental precautions	: Should not be released into the environment. The product should not be allowed to enter drains, water courses or the soil.	

EON 3400				
sion Number 1.1 /ision Date 07/03/2003		Page 3 Print Date 11/11/2		
Methods for cleaning up		ly by sweeping or vacuum. Package all material in ainer for disposal. Refer to Section 13 of this MSDS sal methods.		
	7. HANDLING	AND STORAGE		
Handling	area provided wi	Take measures to prevent the build up of static electricity. Use only in area provided with appropriate exhaust ventilation. Material can create slippery conditions.		
Storage	-	Keep containers dry and tightly closed to avoid moisture absorption and contamination.		
8. EX	POSURE CONTROLS	PERSONAL PROTECTION		
Respiratory protection		Under normal handling conditions a respirator may not be required. If dusty conditions occur wear appropriate respiratory protection.		
Eye/Face Protection	: Safety glasses w	Safety glasses with side-shields.		
Hand protection	: Protective gloves	Protective gloves.		
Skin and body protection	: Long sleeved clo	Long sleeved clothing.		
Additional Protective Measures	: Safety shoes.	Safety shoes.		
General Hygiene Considerations		Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.		
Engineering measures		Heat only in areas with appropriate exhaust ventilation. Provide appropriate exhaust ventilation at machinery.		
Exposure limit(s)				
There are no known hazardo	ous components above reg	ulatory thresholds in this product.		
	9. PHYSICAL AND CH	EMICAL PROPERTIES		
Form Appearance Color Odor Melting point/range Boiling Point: Water solubility	 Solid powder, granular WHITE Very faint Not established Not applicable Insoluble 	Evaporation rate: Not applicable.Specific Gravity: 1.4Bulk density: 20 to 25 lbs/ft3Vapor pressure: Not applicableVapor density: Not applicablepH: Not applicable		
	10. STABILITY A	ND REACTIVITY		

MATERIAL SAFETY DATA SHEET GEON 3400

Version Number 1.1 Revision Date 07/03/2003

Page 4 of 6 Print Date 11/11/2011

Stability	:	Stable.
Hazardous Polymerization	:	Will not occur.
Conditions to avoid	:	To avoid thermal decomposition, do not overheat. Keep away from oxidizing agents and open flame.
Incompatible Materials	:	Avoid contact with strong oxidizers. Also, avoid contact with acetal or acetal copolymers and with amine containing materials during processing. At processing conditions, these materials are mutually destructive and involve rapid degradation. Thoroughly purge and mechanically clean processing equipment to avoid even trace quantities of these materials from coming in contact with each other. Prevent cross contamination of feedstocks.
Hazardous decomposition products	:	Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), other hazardous materials, and smoke are all possible. Prolonged heating (approximately 30 minutes or more) above 392 °F (200 °C) or short term heating at 482 °F (250 °C) may result in produc decomposition and evolution of carbon monoxide and hydrogen chloride.
