| Supplier's details   | :           | <b>POLYONE CORPORATION</b><br>33587 Walker Road, Avon Lake, OH 44012<br>1 (440) 930-1000 or 1 (866) POLYONE |
| Emergency telephone number<br>(with hours of operation)  | :           | CHEMTREC 1-800-424-9300 (24hrs for spill, leak, fire, exposure or accident).                                |

## Section 2. Hazards identification

This mixture has not been evaluated as a whole for health effects. All ingredients are bound in a PVC polymer matrix and potential for hazardous exposure as shipped is minimal. PVC resin is manufactured from Vinyl Chloride Monomer (VCM). PVC resin manufacturers take special efforts to strip residual VCM from their resins. Residual VCM in the resin is typically below 8.5 ppm. However, VCM is a known carcinogen. The end-user (fabricator) should take necessary precautions (mechanical ventilation, local exhaust, respiratory protection, etc.) to protect employees from exposure to any vapors or dusts that may be released during heating or fabrication. See Sections 8 and 11 for special precautions.After handling, always wash hands thoroughly with soap and water.

| OSHA/HCS status                            | : | This material is considered hazardous by the OSHA Hazard<br>Communication Standard (29 CFR 1910.1200). |
|--|---|--|
| Classification of the substance or mixture | : | COMBUSTIBLE DUSTS<br>CARCINOGENICITY - Category 1A   |

### GHS label elements

## **GEON E7130 WHITE 1380**

Version Number 1.16 Revision Date 05/14/2019 Page 2 of 18 Print Date 05/15/2019

| Hazard pictograms                | : |  |
|----------------------------------|---|--|
| Signal word                      | : | Danger   |
| Hazard statements                | : | May form combustible dust concentrations in air.<br>May cause cancer.  |
| Precautionary statements         |   |  |
| General                          | : | Not applicable.  |
| Prevention                       | : | Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection. Wear protective clothing. |
| Response                         | : | IF exposed or concerned: Get medical attention.  |
| Storage                          | : | Store locked up.   |
| Disposal                         | : | Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Supplemental label elements      | : | Keep container tightly closed.   |
| Hazards not otherwise classified | : | None known.  |

## Section 3. Composition/information on ingredients

| Substance/mixture             | : | Mixture    |
|-------------------------------|---|------------|
| Chemical name                 | : | Mixture    |
| Other means of identification | : | VC10000637 |

#### CAS number/other identifiers

| Ingredient name  | %       | CAS number |
|--|---------|------------|
| Titanium dioxide                                       | 5 - 10  | 13463-67-7 |
|  |         |            |
|  |         |            |
| Nickel antimony yellow rutile (C.I. Pigment Yellow 53) | 0 - 0.3 | 8007-18-9  |
|  |         |            |
|  |         |            |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

P<u>olyOne</u>

## **GEON E7130 WHITE 1380**

Version Number 1.16 Revision Date 05/14/2019 Page 3 of 18 Print Date 05/15/2019

Occupational exposure limits, if available, are listed in Section 8.

## **Section 4. First aid measures**

#### **Description of necessary first aid measures**

| Eye contact  | : | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.   |
|--------------|---|---|
| Inhalation   | : | Remove victim to fresh air and keep at rest in a position comfortable<br>for breathing. If not breathing, if breathing is irregular or if respiratory<br>arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give<br>mouth-to-mouth resuscitation. Get medical attention. If unconscious,<br>place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie,<br>belt or waistband. In case of inhalation of decomposition products in a<br>fire, symptoms may be delayed. The exposed person may need to be<br>kept under medical surveillance for 48 hours.   |
| Skin contact | : | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion    | : | Wash out mouth with water. Remove dentures if any. Remove victim<br>to fresh air and keep at rest in a position comfortable for breathing. If<br>material has been swallowed and the exposed person is conscious,<br>give small quantities of water to drink. Stop if the exposed person<br>feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the<br>head should be kept low so that vomit does not enter the lungs. Get<br>medical attention. Never give anything by mouth to an unconscious<br>person. If unconscious, place in recovery position and get medical<br>attention immediately. Maintain an open airway. Loosen tight clothing<br>such as a collar, tie, belt or waistband. |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects |  |
|--------------------------------|--|
| Eye contact                    | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes.                   |
| Inhalation                     | : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs. |
| Skin contact                   | : No known significant effects or critical hazards.  |

## **GEON E7130 WHITE 1380**

Version Number 1.16 Revision Date 05/14/2019 Page 4 of 18 Print Date 05/15/2019

| :       | No known significant effects or critical hazards.   |
|---------|---|
|         |   |
| :       | Adverse symptoms may include the following:<br>irritation<br>redness  |
| :       | Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing   |
| :       | No specific data.   |
| :       | No specific data.   |
| ttentio | n and special treatment needed, if necessary  |
| :       | In case of inhalation of decomposition products in a fire, symptoms<br>may be delayed. The exposed person may need to be kept under<br>medical surveillance for 48 hours.   |
| :       | No specific treatment.  |
| :       | No action shall be taken involving any personal risk or without<br>suitable training. If it is suspected that fumes are still present, the<br>rescuer should wear an appropriate mask or self-contained breathing<br>apparatus. It may be dangerous to the person providing aid to give<br>mouth-to-mouth resuscitation. Wash contaminated clothing |
|         | :<br>:<br>:<br>:<br>:<br>:  |

See toxicological information (Section 11)

## **Section 5. Firefighting measures**

### Extinguishing media

| Suitable extinguishing media<br>Unsuitable extinguishing media | : | Use dry chemical powder.<br>Avoid high pressure media which could cause the formation of a<br>potentially explosible dust-air mixture. |
|--|---|--|
| Specific hazards arising from the chemical                     | : | May form explosible dust-air mixture if dispersed.   |
| Hazardous thermal  | : | May emit Hydrogen Chloride (HCl).  |
| decomposition products   |   | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides                    |

## **GEON E7130 WHITE 1380**

| Version Number 1.16<br>Revision Date 05/14/2019  | Page 5 of 18<br>Print Date 05/15/2019   |
|--|---|
|  | halogenated compounds<br>metal oxide/oxides   |
| Special protective actions for fire-<br>fighters | Promptly isolate the scene by removing all persons from the vicinity<br>of the incident if there is a fire. No action shall be taken involving any<br>personal risk or without suitable training. Move containers from fire<br>area if this can be done without risk. Use water spray to keep fire-<br>exposed containers cool. |
| Special protective equipment for fire-fighters   | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-<br/>contained breathing apparatus (SCBA) with a full face-piece operated<br/>in positive pressure mode.</li> </ul>  |

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel<br>For emergency responders | :     | No action shall be taken involving any personal risk or without<br>suitable training. Evacuate surrounding areas. Keep unnecessary and<br>unprotected personnel from entering. Do not touch or walk through<br>spilled material. Shut off all ignition sources. No flares, smoking or<br>flames in hazard area. Avoid breathing dust. Provide adequate<br>ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.<br>If specialized clothing is required to deal with the spillage, take note<br>of any information in Section 8 on suitable and unsuitable materials.<br>See also the information in "For non-emergency personnel". |
|---|-------|--|
| Environmental precautions                               | :     | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| Methods and materials for containm                      | ent a | nd cleaning up   |
| Small spill   | :     | Move containers from spill area. Use spark-proof tools and explosion-<br>proof equipment. Avoid dust generation. Do not dry sweep. Vacuum<br>dust with equipment fitted with a HEPA filter and place in a closed,<br>labeled waste container. Dispose of via a licensed waste disposal<br>contractor.  |
| Large spill   | :     | Move containers from spill area. Use spark-proof tools and explosion-<br>proof equipment. Approach release from upwind. Prevent entry into<br>sewers, water courses, basements or confined areas. Avoid dust<br>generation. Do not dry sweep. Vacuum dust with equipment fitted<br>with a HEPA filter and place in a closed, labeled waste container.<br>Avoid creating dusty conditions and prevent wind dispersal. Dispose   |
|   |       | E/40   |

vOne

## **GEON E7130 WHITE 1380**

Version Number 1.16 Revision Date 05/14/2019 Page 6 of 18 Print Date 05/15/2019

of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

#### **Precautions for safe handling**

| Protective measures   | : | Put on appropriate personal protective equipment (see Section 8).<br>Avoid exposure - obtain special instructions before use. Do not handle<br>until all safety precautions have been read and understood. Do not get<br>in eyes or on skin or clothing. Do not ingest. Avoid breathing dust.<br>Avoid the creation of dust when handling and avoid all possible<br>sources of ignition (spark or flame). Prevent dust accumulation. Use<br>only with adequate ventilation. Wear appropriate respirator when<br>ventilation is inadequate. Keep in the original container or an<br>approved alternative made from a compatible material, kept tightly<br>closed when not in use. Electrical equipment and lighting should be<br>protected to appropriate standards to prevent dust coming into contact<br>with hot surfaces, sparks or other ignition sources. Take precautionary<br>measures against electrostatic discharges. To avoid fire or explosion,<br>dissipate static electricity during transfer by grounding and bonding<br>containers and equipment before transferring material. Empty<br>containers retain product residue and can be hazardous. Do not reuse<br>container. |
|---|---|--|
| Advice on general occupational<br>hygiene                       | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any incompatibilities | : | Store in accordance with local regulations. Store in a segregated and<br>approved area. Store in original container protected from direct<br>sunlight in a dry, cool and well-ventilated area, away from<br>incompatible materials (see Section 10) and food and drink. Store in a<br>well-ventilated place. Eliminate all ignition sources. Separate from<br>oxidizing materials. Keep container tightly closed and sealed until<br>ready for use. Containers that have been opened must be carefully<br>resealed and kept upright to prevent leakage. Do not store in unlabeled<br>containers. Use appropriate containment to avoid environmental<br>contamination.  |

## Section 8. Exposure controls/personal protection

## **GEON E7130 WHITE 1380**

Version Number 1.16 Revision Date 05/14/2019 Page 7 of 18 Print Date 05/15/2019

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name   | Exposure limits  |
|---|--|
| Titanium dioxide  | OSHA PEL 1989 (1989-03-01)<br>TWA 10 mg/m3 Form: Total dust<br>OSHA PEL (1993-06-30)<br>TWA 15 mg/m3 Form: Total dust<br>ACGIH TLV (1996-05-18)<br>TWA 10 mg/m3  |
| Nickel antimony yellow rutile (C.I.<br>Pigment Yellow 53)               | OSHA PEL (1993-06-30)<br>TWA 1 mg/m3 (as Ni)<br>OSHA PEL 1989 (1989-03-01)<br>TWA 0.1 mg/m3 (as Ni) Form: Soluble<br>ACGIH TLV (1998-09-01)<br>TWA 0.1 mg/m3 (as Ni) Form: Inhalable fraction<br>OSHA PEL (1993-06-30)<br>TWA 1 mg/m3 (as Ni)<br>OSHA PEL 1989 (1989-03-01)<br>TWA 1 mg/m3 (as Ni)   |
| Appropriate engineering controls :<br>Environmental exposure controls : | fumes, gas, vapor or mist, use process enclosures, local exhaust<br>ventilation or other engineering controls to keep worker exposure to<br>airborne contaminants below any recommended or statutory limits.<br>The engineering controls also need to keep gas, vapor or dust<br>concentrations below any lower explosive limits. Use explosion-proof<br>ventilation equipment.                    |
| Individual protection measures  | necessary to reduce emissions to acceptable revers.  |
| Hygiene measures :  | Wash hands, forearms and face thoroughly after handling chemical<br>products, before eating, smoking and using the lavatory and at the end<br>of the working period. Appropriate techniques should be used to<br>remove potentially contaminated clothing. Wash contaminated<br>clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |

## **GEON E7130 WHITE 1380**

| Version Number 1.16<br>Revision Date 05/14/2019 |   | Page 8 of 18<br>Print Date 05/15/2019  |
|---|---|--|
|   |   |  |
| Eye/face protection                             | : | Safety eyewear complying with an approved standard should be used<br>when a risk assessment indicates this is necessary to avoid exposure to<br>liquid splashes, mists, gases or dusts. If contact is possible, the<br>following protection should be worn, unless the assessment indicates a<br>higher degree of protection: safety glasses with side-shields. If<br>operating conditions cause high dust concentrations to be produced,<br>use dust goggles.   |
| Skin protection                                 |   |  |
| Hand protection                                 | : | Chemical-resistant, impervious gloves complying with an approved<br>standard should be worn at all times when handling chemical products<br>if a risk assessment indicates this is necessary. Considering the<br>parameters specified by the glove manufacturer, check during use that<br>the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures,<br>consisting of several substances, the protection time of the gloves<br>cannot be accurately estimated. |
| Body protection                                 | : | Personal protective equipment for the body should be selected based<br>on the task being performed and the risks involved and should be<br>approved by a specialist before handling this product.  |
| Other skin protection                           | : | Appropriate footwear and any additional skin protection measures<br>should be selected based on the task being performed and the risks<br>involved and should be approved by a specialist before handling this<br>product.   |
| Respiratory protection                          | : | Based on the hazard and potential for exposure, select a respirator that<br>meets the appropriate standard or certification. Respirators must be<br>used according to a respiratory protection program to ensure proper<br>fitting, training, and other important aspects of use.  |

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be

vOne

| New York          | : | None of the components are listed.                     |
| New Jersey        | : | The following components are listed:                   |
|                   |   | Nickel antimony yellow rutile (C.I. Pigment Yellow 53) |
|                   |   | Calcium carbonate                                      |
|                   |   | Titanium dioxide                                       |
|                   |   | Ethene, chloro-, homopolymer                           |
| Pennsylvania      | : | The following components are listed:                   |
|                   |   | Titanium dioxide                                       |
|                   |   | Calcium carbonate                                      |
|                   |   | Nickel antimony yellow rutile (C.I. Pigment Yellow 53) |

#### California Prop. 65

**WARNING:** This product can expose you to chemicals including Titanium dioxide, Nickel antimony yellow rutile (C.I. Pigment Yellow 53), which are known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

| Ingredient name   | No significant risk level | Maximum acceptable<br>dosage level |
|---|---------------------------|------------------------------------|
| Titanium dioxide  | No.                       | No.                                |
| Nickel antimony yellow rutile (C.I. Pigment<br>Yellow 53) | No.                       | No.                                |

United States inventory (TSCA 8b) : All components are listed or exempted.

| Physical hazards |   | 0 |
|                  |   |   |

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual. History
